NRMP’s Charting Outcomes in Match

Chart 9
Mean Number of Abstracts, Presentations, and Publications of U.S. Allopathic Seniors by Preferred Specialty and Match Status

Applicants were asked to list the number of abstracts, presentations, and publications they reported in their ERAS applications. This information is self-reported and may include peer-reviewed articles, abstracts, poster sessions, and invited national or regional presentations. Some residency programs may independently verify and even review publications for applicants in whom they have an interest, but most probably do not.
